

a

Four temperature-mortality curves

Median across 40 cities, IQR shaded

Exposure-response function

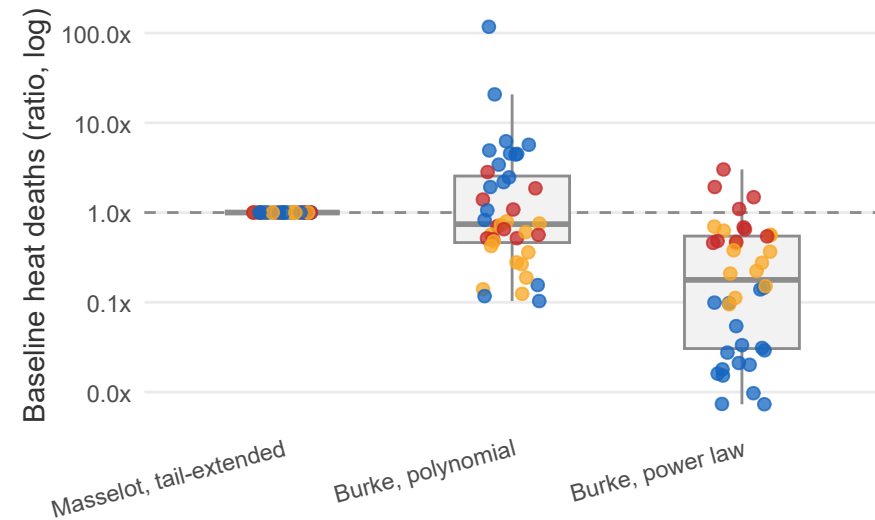

- Masselot (main)
- Masselot, tail-extended
- Burke, polynomial
- Burke, power law

b

Effect on baseline heat mortality

Relative to the Masselot main specification (dashed).

The tail extension binds in 3 of 40 cities (max 0.4%); the Burke families mo

Climate cluster

- Hot
- Temperate
- Cool
